

## The Programme

Sports Law has become an established field of legal scholarship and practice.

On this basis the *Sports Law and Policy Centre* (SLPC) organizes the Executive Programme in Sports Law and Justice in order to provide an in-depth analysis of the latest development in such a fascinating and complex field.

The Programme in International Sports Law is designed for qualified lawyers and for those who already work for Sports Associations, Leagues and Clubs.

In this perspective the lecturers will examine the current legal provisions as adopted by the Sports Associations as well as the latest case law delivered by the highest sports arbitration bodies and international ordinary tribunals.

The Executive Programme offers an intensive study period on law as applied to sport.

The programme is English taught and structured in a six-day period in the beautiful Amalfi Coast.

A Social Programme with excursions to some other beautiful places such as *Positano, Capri, Pompei, Sorrento* and *Paestum* will be organized for the benefits of the participants and their partners.
